

Save The Date!

For 2021, the annual Illinois Conservation Cropping Seminars are going...

-VIRTUAL-

Managing your inputs for healthy soils...

For Immediate Release: November 12, 2020

Don't miss information about ways farmers like yourself can improve soil health, learn about cover crops, remain profitable—and even more marketable—by using sustainable techniques that build up natural resilience to weather extremes, pests, and weeds. Learn from educators, researchers, experts, and local Illinois farmers! There will be Question & Answer sessions as well.

In keeping with state mandates and safety precautions, we will offer helpful information, new research and data, farmer testimonials, and more in three 2-hour online virtual conference sessions. Dates & times:

Wednesday Jan. 20th, 2021 9 – 11 am	Thursday Jan. 28th, 2021 9 – 11 am	Thursday Feb. 4th, 2021 9 – 11 am
--	--	---

While it's not our normal full-day, in-person get-together at three different Illinois locations, the planning committee has gathered some GREAT speakers and presentations that are well worth your time. We can't feed you lunch virtually, so for 2021, your participation at the event is FREE—and lunch is "on your own"!

Scheduled speakers currently include:

- Ray Archuleta, Certified Professional Soil Scientist with the Soil Science Society of America
- Dr. Joel Gruver, Western IL University, Associate Professor of Soil Science and Sustainable Ag
- Dr. Nic Jelinski, Asst. Professor at University of MN's Department of Soil, Water, and Climate
- Illinois S.T.A.R. program coordinators & testimonials from farmer participants
- Dr. Stacy Zuber, IL NRCS Soil Health Specialist
- With a special appearance from The Peterson Farm Brothers...

Don't miss the 2021 event! We still need you to register online at the Champaign County SWCD website at www.ccswcd.com, so reserve yourself a spot today! Certified Crop Advisor (CCA) CCU's will be applied for these three seminars—stay tuned for more information.

The Conservation Cropping Seminars, held for the last seven years, are organized and made possible with the involvement and support of Illinois Department of Agriculture, USDA's Natural Resources Conservation Service, American Farmland Trust, the Illinois Stewardship Alliance, Illinois Environmental Protection Agency, University of Illinois Extension, and local Soil and Water Conservation Districts.
