

CHAMPAIGN COUNTY SOIL & WATER CONSERVATION DISTRICT

# 2018 AQUATIC PLANT SALE

Native Plants for Pond Edges and Wetlands.

Species	Price	Quantity Ordered	Total Cost
<b>New England Aster</b> ( <i>Aster Novae-angliae</i> ) a common plant that produces showy blossoms into fall. The purple flowers are highly attractive to butterflies. Grows in both moist and dry soils and may attain heights of 4 feet. Plant in groups spaced to create the desired aesthetic effect.	\$10/plant		
<b>Rattlesnake Master</b> ( <i>Eryngium yuccifolium</i> ) warm-season perennial native forb which grows well on wet or dry mesic prairie soil. Plants grow 2 to 6 feet tall from a short, thick rootstock. Flower heads have a honey-like odor and are in bloom June to September. ( <a href="http://plants.usda.gov">http://plants.usda.gov</a> )	\$10/plant		
<b>Rose Mallow</b> ( <i>Hibiscus lasiocarpus</i> ) Grows from 3-5 feet tall grows along wet edges of ponds, lakes, ditches and streams and in low wet woods. It is know for its showy flowers which bloom July through October.	\$10/plant		
<b>Great Green Bulrush</b> ( <i>Scirpus atrovirens</i> ) Perennial that prefers full sun in wet to moist soil.	\$10/plant		
<b>Prairie Ironweed</b> ( <i>Vernonia Fasciculata</i> ) Purple flowers are highly attractive to butterflies in late summer. Ironweed will grow in moist soil, just above the water's edge. The primary purpose for planting Ironweed is to add color to the pond's edge. Ironweed may grow to heights of five feet, but 3-4' is the average. Plant in groups spaced to create the desired aesthetic effect.	\$10/plant		

Our Plant Sale is Back With Some Changes!  
 Plants will come in a pot with at least 6" top diameter and 5" tall and are grown using the RPM (Root Pruning Method) from Forrest Keeling, meaning plants should have more roots, transplant easier and have a higher survival rate.
